

Architectural Technology Tool List - First-year (Freshman)

Current as of August 8, 2009

These tools are required for all first-year students and are required to be on-hand when you begin classes. You may contact the First-year professor, Kimberly Hitchcock at hitchcock@stevenscollege.edu with questions. Tool-lists are subject to change, so students should check with the professor during the summer to see if any changes have been made.

The following are possible sources for the tools. Don't forget about checking at local big-box stores (e.g., Wal-Mart) for some supplies/tools. Where possible the source of tool costs and part numbers (as of the above date) are listed in the table below (compare prices with various sources). Take special note of the allowances built into the tool-list. Please reserve some money to pay for supplies and special presentation items. Most items will be used in both years (and your career in Architectural Technology). **Be sure to bring a lock for your studio locker, pens, pencils, and 1 or 2 three-ring binders with note paper!**
